herdr - panes, tabs, agents

PREFIX = press `ctrl`+`b`, let go, then press the key · **PREFIX** `?` shows all keys

Scroll up and copy text (no mouse)

PREFIX `y`	**Start copy mode** (scroll back)
`k` / `j`	Up / down 1 line
`ctrl`+`u` / `ctrl`+`d`	Up / down half a screen
`fn`+`↑` / `fn`+`↓`	Up / down 1 screen
`{` / `}`	Up / down 1 paragraph
`h` / `l`	Left / right 1 character
`w` / `b` / `e`	Next word / back / end of word
`?` text `enter`	**Search up** (fastest)
`/` text `enter`	Search down
`n` / `N`	Next / previous result
`v` or `space`	Start selection
`y` or `enter`	**Copy** and close
`q` or `esc`	Close, no copy
`cmd`+`v`	Paste

`ctrl`+`b` does not page up in copy mode. Use `ctrl`+`u`

Example: copy an old error

1. **PREFIX** `y` - copy mode
2. `?` error `enter` - search up
3. `n` - next one up, if needed
4. `v` - start selection, then `j` `j` `e` to grow it
5. `y` - copy
6. **PREFIX** `l` - go to the other pane, then `cmd`+`v`

Panes

PREFIX `h` `j` `k` `l`	**Go to pane** left / down / up / right
PREFIX `%`	New pane on the right
PREFIX `"`	New pane below
PREFIX `z`	Full screen pane (again = back)
PREFIX `x`	Close pane
PREFIX `H` `J` `K` `L`	Swap pane left / down / up / right
PREFIX `r`	Resize mode (`h` `j` `k` `l`, `esc` to stop)

Tabs

PREFIX `c`	New tab
PREFIX `n` / `p`	Next / previous tab
PREFIX `1`..`9`	Go to tab 1..9
PREFIX `T`	Rename tab
PREFIX `&`	Close tab

Workspaces and agents

PREFIX `g`	**Go to**: search workspaces, tabs, agents
PREFIX `w`	Workspace navigation (`esc` to leave)
PREFIX `N`	New workspace
PREFIX `W`	Rename workspace
PREFIX `D`	Close workspace
PREFIX `b`	Show / hide agents sidebar
PREFIX `q`	Leave herdr. All keeps running.
`herdr`	Start, or go back in

Firstmate (you are the captain)

1. `herdr`
2. `cd ~/firstmate && claude`
3. Tell it the job. Crew opens in new tabs.
4. **PREFIX** `g` to watch a crew member

Shell, Neovim, WezTerm, macOS

No mouse needed

Shell (zsh)

`ctrl`+`f`	**Accept the grey suggestion**
`ctrl`+`r`	Search old commands
`tab`	Complete a command or path
`ctrl`+`a` / `ctrl`+`e`	Start / end of line
`ctrl`+`w`	Delete word before cursor
`ctrl`+`u`	Delete the line
`ctrl`+`l`	Clear the screen
`ctrl`+`c`	Stop the running command
`↑` / `↓`	Last / next command

Short commands

`keys`	Open this cheatsheet (`q` to close)
`..`	Up 1 folder
`add`	git add .
`push` / `pull`	git push / git pull
`m`	git switch main
`lazygit`	Git in the terminal
`cc`	Claude, no permission prompts (careful)
`co`	Codex, full auto (careful)
`./rebuild.sh`	Apply dotfiles changes (in ~/dotfiles)

Neovim (nvim · leader = `space`)

`space` `f`	**Find file**
`space` `s`	Search text in project
`space` `b`	Open files (buffers)
`space` `e`	File browser
`space` `g`	Git
`i` / `esc`	Start typing / stop typing
`esc` (not typing)	Save
`ctrl`+`a`	Select all
`ctrl`+`w` `h` `j` `k` `l`	Go to split left / down / up / right
`u` / `ctrl`+`r`	Undo / redo
`:q` `enter`	Quit

WezTerm (the window)

`cmd`+`t` / `cmd`+`w`	New tab / close tab
`cmd`+`1`..`9`	Go to tab 1..9
`cmd`+`shift`+`[` / `]`	Previous / next tab
`cmd`+`n`	New window
`cmd`+`f`	Search the output
`cmd`+`=` / `-` / `0`	Text bigger / smaller / reset

Use herdr for panes and tabs. herdr keeps them when the window closes.

macOS

`cmd`+`space`	Open an app (type its name)
`cmd`+`tab`	Switch app
`cmd`+`` ` ``	Switch window, same app
`cmd`+`q`	Quit app
`cmd`+`h`	Hide app
